College Park, MD

Education

University of Maryland

College Park, MD

Bachelor of Science in Computer Science | Minor: Business

Expected May 2029

- **Honors:** Data Justice Scholars Program
- **Coursework:** Object-Oriented Programming I-II, Calculus I-II, Networking Concepts
- **Organizations:** Code:BLACK, NSBE, ColorStack, Claude Builder Club, Black Business Association

Experience

University of Maryland — Department of IT, Classroom Support

March 2026 – Present

Student Field Technician

College Park, MD

- Diagnose and resolve AV system, projector, networking, and lecture-capture issues across 50+ classrooms and event spaces under time-critical SLAs
- Triage real-time support tickets from faculty and staff, applying systematic root-cause analysis to restore classroom technology and minimize instructional downtime
- Collaborate with full-time IT engineers on recurring infrastructure audits and preventive equipment inspections, maintaining high classroom uptime ahead of scheduled sessions

Hack4Impact — Full-Stack Developer & Project Designer

September 2025 – Present

Full-Stack Developer & Project Designer

- Deliver full-stack web applications using React.js, Firebase, Node.js, and REST APIs in a client-facing Agile/Scrum environment, shipping features on two-week sprint cycles
- Translate client requirements into high-fidelity Figma prototypes, streamlining developer handoff and reducing design-iteration cycles

Projects

EchoSense | Real-Time ASL Interpreter | 5th Place, Machine Learning Track – Bitcamp 2026

April 2026

- Developed a browser-native ASL interpreter tracking 21 hand landmarks at 30 fps via Google MediaPipe WebAssembly, supporting three translation modes (Phrase, Spell, Sentence) with zero server round-trips
- Engineered a custom ASL grammar pipeline (Lexer, Parser, LLM Evaluator) powered by Anthropic Claude Sonnet to convert ASL syntax into grammatically correct English, paired with ElevenLabs Turbo v2 voice synthesis
- Integrated UMD's TerpAI gateway on Microsoft Azure as a real-time conversation monitor, generating 3 contextual sentence suggestions per translation based on full session history

202 Connect | AI-Powered Civic Resource Platform | BisonHacks, Howard University

February 2026

- Architected and deployed a multilingual civic resource platform on Firebase, designed to serve 116,000+ DC residents with a Node.js backend and real-time database for low-latency data delivery
- Built a ward-level demand heatmap using Leaflet.js and cloud-synced data streams, reducing estimated resource discovery time by 40%
- Implemented a five-factor AI Trust Score system via Google AI Studio API to surface reliable community resources through automated credibility scoring

Leadership

Goldman Sachs Possibilities Series — Participant

April 2026

- Developed industry skills in financial technology, market analysis, and professional communication through direct engagement with Goldman Sachs professionals and structured programming sessions
- Gained an introduction to financial services spanning investment banking, asset management, and capital markets
- Connected with a cohort of high-performing peers and Goldman Sachs professionals across finance, technology, and operations

Data Justice Scholars Program — Student Ambassador

March 2026 – Present

- Represent the program to prospective students, parents, and university stakeholders, driving engagement through outreach events and advocacy initiatives

Technical Skills

Languages & Frameworks: Java, JavaScript, Python, TypeScript, React.js, Node.js, TailwindCSS, Vite

Cloud & Infrastructure: AWS (EC2, S3, VPC), Microsoft Azure, Google Cloud Platform, Firebase, Vercel

Networking & Systems: DNS, TCP/IP, HTTP, REST APIs, Linux/Unix, AV/IT Systems

Tools & Methods: Git/GitHub, Postman, Figma, Agile/Scrum, CI/CD
